

CSE115a – Final Presentation

- Length: ~10 minutes (8min presentation, 2min Q&A)
 - Practice; time yourself; time limit will be enforced as necessary
- Your slides
 - *Should* help structure and illustrate your talk
 - Should *not* distract from your talk
- Avoid
 - small fonts
 - running prose
- Use
 - key words or phrases
 - Illustrations
- Explain why, what, and how
 - context (breadth)
 - details (depth)

Slide 1

- Project title
- external sponsors, if any
 - individuals and organization they're affiliated with
- Project team name (if different from project title)
- Team members
- Date

Slides 2ff

[Use **different slides** for the **different bullet points**]

- Brief introduction into problem/application domain
 - What motivated your choice of project
 - Discuss intended users, problem or opportunity addressed
- Goals you
 - set out to achieve
 - have achieved
- Biggest challenges

[this slide can also be placed toward the end of the presentation]

 - Regarding your final product
 - Regarding your development process

Slides 2ff (cont'd 1)

[Use **different slides** for the **different bullet points**]

- System Screenshots/Video/Live demo
 - Careful with live demos (nothing will ever go wrong...); have a back-up (screenshots)
- System overview/diagram
 - Architecture diagram and/or screen flow (whichever is most helpful in understanding your app)
- Technologies you used and what you used them for
 - Use your **system diagram** to associate **components** with **technologies**
 - Please, **no** technology logo soup!

Slides 2ff (cont'd 2)

- Project management techniques you used
 - Focus on any additions to or deviations from the Scrum framework
- Things you
 - enjoyed
 - didn't enjoy
- Lessons learned
 - what worked/what you will keep doing
 - what didn't work/what you will stop doing
 - things you wished you had done
(that you would start doing in the future)
